

IBC Mother Tank

Polymaster

Safe, easy IBC decanting

Polymaster's IBC Mother Tank has a 1,500 Ltr capacity, allowing operators to easily empty a full IBC without risk of overfilling.

The IBC Mother Tank is ideal in applications where it is connected to in-line systems requiring continual dosing. It removes the need to shut down chance of spilling / splashing whilst transferring chemical – reducing OH & S issues onsite.

REDUCE DOWNTIME

Continuous chemical dosing without IBC swapover interruptions

REMOVES WASTAGE

Design allows for complete drainage of IBC, no residual chemical wasted

PREVENTS OHS INCIDENTS

Design allows for easy and safe connection of IBC transfer hose, no residual chemical spills

CERTIFIED DESIGN

Designed and certified to HSNO standards (NZ) and AS/NZS 1170.2

EASY IBC LOADING

Design allows for loading IBC from all 4 sides

APPLICATIONS

- Temporary chemical trials
- Continuous chemical dosing
- Decanting large quantities of IBC's

TESTIMONIAL

“Interest is high for safety reasons as we do not need to connect and disconnect pumps when changing over IBC's, and if they fully drain the connection hose no spillage here either. Also, the IBC can be completely drained which as polymer is 5-10 dollars a litre, it can add up to a fair bit of money..”

1500 Litre IBC Mother Tank

Support to suit IBC c/w
4-way forklift access

Angled IBC support for
complete IBC drainage

One-piece
polyethylene tank

Overflow line

Powercoated
steel frame

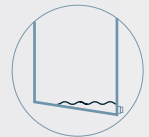

Two way forklift access

Flexible hosing for IBC
connection (optional)
code: MTH40FF)

Camlock fill
connection

Sight glass (optional)
code: MTST1500-F

Full height spray
shield on all sides

Sump outlet for
complete drainage

* IBC not included

Bund to suit IBC Mother Tank

Capacity exceeds
110% of 1500Ltr IBC
Mother Tank to meet
AS regulations

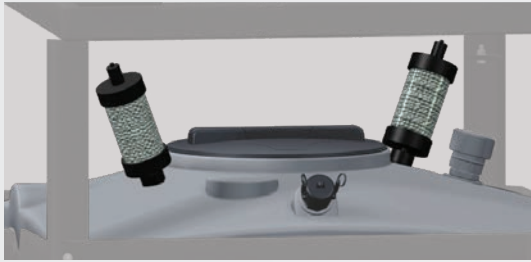

Optional Fibreglass
reinforced grating for
access or mounting

One-Piece PE
Construction –
Chemical Resistant

* IBC not included

Options

MEDIA FUME SCRUBBER

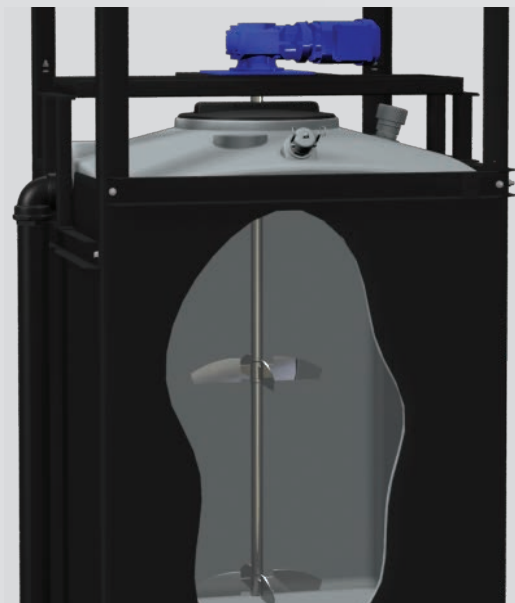

- Safe storage of fuming chemicals
- Liquid absorbing desiccant technology
- Low maintenance costs

IBC TRANSFER HOSE

- Camlock ends for easy connect/disconnect to IBC
- Chemical resistant flexible hosing

AGITATOR

- Integrated support removes need for installation
- Low profile motor – 90° gear box
- Agitator engineered for application

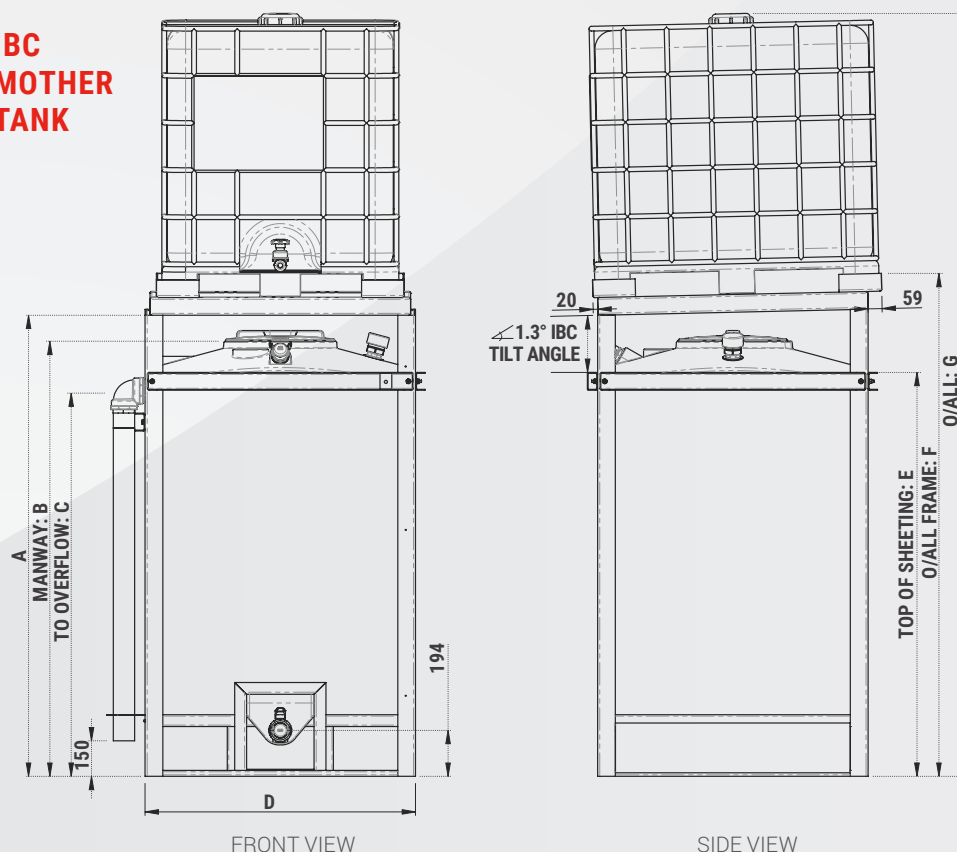

SIGHT TUBE

- Rigid UPVC tubing for longevity
- Separate isolation valve
- Easy clip-on / clip-off installation replacement
