## About Polymaster

Polymaster are manufacturers of an extensive range of quality products for industrial, residential and agricultural applications. Over the last two decades, Polymaster has been at the forefront of industry endorsed, product certified designs that have advanced the life-span and functional capabilities of process vessels, bulk storage, rainwater tanks and animal care products. As an Australian owned, quality assured company, Polymaster delivers every product to specification with confidence through our growing network of distributors.

## Product Development

We continue to extend our manufacturing operations to achieve market diversification and operational longevity. Our Design & Mould team offers custom design solutions and continual scope for new product development, product improvements and modifications. Coupled with our ability to customise colours to specification and apply brand identities on request, Polymaster delivers on quality and quantity, on time and within budget.

## Manufacturing Capabilities

As a broad based manufacturing company with over 60 employees, our manufacturing operations across Victoria, South Australia and New South Wales cover in excess of 20,000 square metres. Production Management personnel take a streamlined approach to bulk order processing, exercising full use of all facilities when required. Our dedicated Modifications Team works closely with Process & Hydraulic engineers to achieve customised solutions for specified duties. With tested and proven ability to cope with peak demand for our products, we offer short lead times on volume orders to any location.

## Logistics Capabilities

Polymaster's distribution fleet are experienced in over dimensional loads, general freight and site handling, providing the flexibility and capability to deliver every Polymaster product. Our manufacturing locations in Victoria and New South Wales supported by warehouses in Melbourne and Adelaide supply direct freight lines to Melbourne, Adelaide and Sydney. To service deliveries nationwide, over time we have established quality relations with proven logistics channels. Bulk storage capacity and warehouse pick-up capabilities are available from Metropolitan Melbourne and Adelaide.

## Environmental Management

Polymaster's manufacturing methods embrace environmental considerations as a central philosophy. We implement recycled heat technology; minimising on the LPG required to manufacture each product, reducing operating costs and most importantly, our CO2 emissions. Excess materials are fully recycled and water re-use programs help to lessen our impact on Australia's natural resources.

## Quality Assurance

As a quality certified company, Polymaster's quality assurance regimen is internationally recognised and certified to ISO9001 standards. Our exclusive use of UV stabilised premium resins to AS/NZS 4766 standards, combined with FEA testing and engineering for every mould design assures quality in the manufacture of every Polymaster product. Every tank is independently certified to SAI Global's AS/NZS 4766:2006 standard and labelled to display manufacturing details and serial number for complete traceability.
